Invitation

to a Preventive Healthcare Workshop on the 14 and 15 November 2009 – Novena Medical Center

vita-life® - the market leader presents itself

When it comes to magnetic resonance the Austrian company vita-life® is the number 1 in the world. What has been used successfully in sports medicine in Europe and North America for years, has now become established in different medical areas: from the treatment of chronic pain and stress associated illnesses over orthopedics, dental medicine and gynecology to complementary oncology and many more.

The pulsating magnetic fields of the vita-life® system have been proven to support cell regeneration and therefore have a positive influence on the entire organism. Magnetic resonance stimulation finds not only a wide application in the treatment of illnesses but also in active preventative medicine.

Dr. med. Martin Gschwender

is one of the most well known experts worldwide on the field of magnetic field therapy. He has gathered over 20 years of practical experience using Magnetic fields as therapeutic measures. Through his lectures he shares this practical experience with colleagues all over the world. His extensive professional medical education includes internal medicine - cardiology, intensive care medicine, orthopaedics, sports- and general medicine. Parallel to his regular medical training he pursued a qualification in Traditional Chinese Medicine, orthomolecular medicine - natural-based "well-aging" strategies and various forms of "energetic - energizing medicine". Since 2001 he is settled in his own private clinic in Munich - Germany. He is medical consultant to a number of international world class athletes and international VIPs.

Collectively towards success

There is an ever increasing demand in medicine to consider the human being as a unique whole, and to help him achieve a balanced and vigorous life. vita-life® Magnetic Field Resonance Stimulation provides you with an instrument to possibly support and accelerate the healing processes of your patient in many cases. International research has shown the effectiveness of magnetic field resonance stimulation and endorses the method as a meaningful addition to conservative therapy and preventive health care.

In addition, as a referral or franchise partner, you actively participate in one of the fastest growing markets in the 21st century. It gives you additional attractive earning possibilities through extra services, and further commissions through the sale of vita-life® products to end users. The Preventive Healthcare Workshop is the official introduction of the vita-life® business in Asia and offers, based on its unique market position, new fantastic business ideas and opportunities.

Program

Date	Time	DESCRIPTION	PRESENTER	VENUE
14 th Nov	08 ³⁰ am - 12 ³⁰ am	New Distributors Orientation (NDO)	Mario Hintermayer	Novena Medical Center conference room # 08-23
	12 ³⁰ am - 01 ³⁰ pm	Lunch and teabreak
